Hepro Community has existed since 2006. It has been a platform for information dissemination of international projects that matches the philosophy of Hepro Community, namely that a successful public health work requires collaboration between public health workers, planners, politicians, researchers and educational systems.

So far, the following projects have been initiated:

- [HEPRO \(2005 - 2008\)](#)
- [The youth survey 2008](#)
- [Dialogue \(2009\)](#)
- [HEPROGRESS \(2010-2012\)](#)
