Over thirty participants enjoyed two days of presentations and discussions in the beautiful surroundings of NHV – The Nordic School of Public Health in Gothenburg.

- We are well satisfied with the meeting, and we are optimistic about the project application, says Project Director Arvid Wangberg.

He formally handed over the project management to Jane Pedersen and the North Denmark Region, who will continue working with the application. Østfold County Council will, subject to approval, assume the role of Communication Manager during the project.

- We believe DIALOG is an exciting and good project that is addressing the health gap in the Baltic Sea Region in innovative ways. The project is also based on tools and results developed in HEPRO, says Wangberg.
